

Recovery from "Check Position" Message using Smart Pendant

Introduction

This document describes how to recover from a "Check Position" message on the pendant, as shown below.

				Х нір	E
Contr Code 20	oller Me	ssage			
Check position [R1]	n				s
	Check position [P1]	Controller Me Code 20054	Controller Message Code 20054 Check position [PT]	Controller Message Code 20054 Check position [PT]	Controller Message Code 20054

Recovery Procedure

NOTE: This procedure can be completed at any security level when there are no outstanding alarms.

1. From the Main Menu, select "Robot Settings" and then "Robot Configuration."

Recovery from Check Position Message with Smart Pendant v1.docx 11/30/2023

Shared Integration Experience

This document captures ideas, experiences, and informal recommendations from the Yaskawa Partner Support team. It is meant to augment – not supersede manuals or documentation from motoman.com. Please contact the Partner Support team at <u>partnersupport@motoman.com</u> for updates or clarification.

- Default position on all axes is 0.000 degrees. The orientation of the robot/station will vary based upon model. Be sure to have the Position Setup tab selected and the "Robot Position" drop down menu reads "Robot Position Confirm."
- SPECIFIED position can be modified if needed to accommodate for cell layout

3. With Servos engaged, press and hold "Go To Position" until all axes read "Axis Reached."

Robot will move to the SPECIFIED position.

Use caution when moving the robot. Be aware of possible interference.

Manual JOINT jogging may be required to avoid interferences to complete motion to the SPECIFIED position.

Cartesian motion (Robot, User, and Tool) may not work with Check Position message.

4. Press the "Confirm Position" button. There will be a confirmation popup window and the box below Robot Position Confirm will change to "Confirmed."

Position Setup Ho	me Calibra	ition			The robot's posit	ion was succ	essfully confirm	ed.	
Nove to Reference Position	s Used for I	Robot Operation			Move to Reference Positi	ons used for	RODOL Operation

CONFIRM POSITION	в		O AXIS REACHED	L.	CONFIRMED	в	0.000 °	O AXIS REACHED	
	т		AXIS REACHED			т	0.000 °	AXIS REACHED	

- 5. If this is a single robot without an external axis, proceed to step 8. Controllers with multiple groups(robot(s) and/or station(s)), continue with step 6.
- 6. Confirm origin of Check position, highlighted in message.

PARTNER SUPPORT
Shared Integration Experience

This document captures ideas, experiences, and informal recommendations from the Yaskawa Partner Support team. It is meant to augment – not supersede manuals or documentation from motoman.com. Please contact the Partner Support team at partnersupport@motoman.com for updates or clarification.

7. Use the Control Group on the lower jog screen to select the group highlighted in the message.
